BOMBAY

PRINTED AT THE GOVERNMENT CENTRAL PRESS

1936

Obtainable from the Superintendent, Government Printing and Stationery Bombay, or through the High Commissioner for India, India House, Aldwych, London, W.C.2, or through any recognised Booksellers

The appointment of a Lay Secretary for the J. J. Group of Hospitals mentioned in the last triennial report has proved valuable and the pay of the present incumbent holding the post was increased. He is now responsible for non-technical administrative duties at the following Hospitals :—

1. J. J. Hospital
2. B. J. Hospital for Children
3. Sir C. J. Ophthalmic Hospital
4. Bai Motlibai and Petit Hospitals
5. G. T. Hospital
6. Cama and Albless Hospitals

and arranges for certain supplies such as clothing, etc., at other Hospitals in the Presidency.

St. George's Hospital, Bombay.

4. The Reorganisation Committee of 1932 recommended the closing of the Hospital and sale of its site. They also proposed that a small Hospital of 100 beds for European patients should be provided on another site. Government did not accept these recommendations, but appointed a Committee in February 1934 to make proposals in order to secure that the facilities afforded by the Hospital, are more generally availed of and that the net cost per patient to Government is reduced. The recommendations of this Committee have been accepted by Government in the main. The lay administration of the Hospital is now vested in a Managing Committee, who subject to the guidance, direction and control of Government exercise the following powers and perform the duties mentioned below :—

(*i*) Preparation of the Annual Budget estimates of the Hospital under the following heads, excluding those relating to the pay and allowances of Medical Officers and the annual grant to the Nursing Association of the Hospital—

(*a*) Superior Establishment.
(*b*) Inferior Establishment.
(*c*) Contract Contingencies.
(*d*) Pay of Menials—Non-contract.
(*e*) Temporary Establishment.
(*f*) Non-contract Contingencies.
(*g*) Other supplies and services.

(*ii*) Supervision of expenditure in respect of all the Heads for which the Committee are responsible for framing the Budget Estimates including passing of bills for payment under (*e*) to (*g*).

(*iii*) Power to reallocate expenditure between the various heads mentioned in (*i*) and (*ii*) above, subject to certain restrictions.

(*iv*) Disciplinary control over the menial establishment of the Hospital. Appeals against the decision of the Committee lie to the Surgeon-General under the Bombay Civil Services, Conduct, Discipline and Appeal Rules.

gitized with financial assistance from th
Government of Maharashtra
on 11 July, 2017

(*v*) Control of private funds formerly solely administered by the Superintendent.

(*vi*) Control over such minor grant for repairs as may be placed annually at the disposal of the Committee by the Superintending Engineer, Northern Circle, subject to such directions as he may give.

(*vii*) Control over such discretionary grant for unforeseen and urgently necessary works as may be placed at the disposal of the Committee by the Surgeon-General subject to such directions as he may give.

Mofussil Hospitals.

5. During the year 1933 the principle of appointing Advisory Committees was extended to the following Civil Hospitals :—

Civil Hospital, Sholapur.
" " Satara.
" " Ahmednagar.
" " Bijapur.
" " Jalgaon.
" " Surat.
" " Sukkur.
" " Nasik.

A new X-Ray Apparatus was installed at the Civil Hospital, Ahmedabad, at a cost of Rs. 9,000.

Hospital Fees.

6. The Hospital Fee Rules were revised in 1932 with a view to increasing the receipts by lowering the limit of chargeable income from Rs. 1,800 to Rs. 1,000 per annum. The levy of one anna fee on out-patients and 2 annas on the in-door patients introduced during the previous triennium was continued. It is satisfactory to note that although there has been a decrease in attendance of out-door patients, the number of in-patients treated has slightly increased, as also have the receipts from Hospital fees.

The levy of one anna and 2 annas fees referred to above was at first compulsory in the case of all dispensaries but in view of representations made by Local Bodies, Government decided to allow them full discretion in the levy of the fees at the dispensaries maintained by them.

Hospital Funds.

7. The position of the Hospital Funds remained more or less unchanged during the triennium under report and their use is still restricted to expenditure on diets, medicines and instruments by way of supplementing Government grants. A wider scope for these Funds has been suggested to include other items which can be included under the term "Medical relief."

Hospital Nursing.

8. The position as regards Hospital Nursing and Training is the same as stated in the last Triennial Report. As regards the proposal to replace the Council of the Presidency Nursing Association by a statutory body analogous to the Medical Council, the Bombay Nurses, Midwives and Health Visitors Registration Act was passed by the Legislative Council after the close of the triennium under report, and has been brought into operation.

Medical Relief in general.

9. The Government hospital organisation in urban areas has functioned satisfactorily during the period under review, and a high standard of medical treatment has been maintained. Medical relief for rural areas, however, still remains an unsolved problem, and as pointed out in the concluding sentence of paragraph 7 of the last triennial Report, is a defect in our medical organisation which requires mention and emphasis.

During the period under review progress has been made in several districts. In Sholapur 13 new dispensaries have been opened in buildings provided free of rent by villages, with a medical officer and a midwife attached to each and at a recurring cost of about Rs. 1,700 per annum each. In Larkana three dispensaries have been opened each in charge of a qualified Medical Officer and it is proposed to open one such dispensary for every 10 miles. Each dispensary costs about Rs. 3,000 annually. Ten maternity homes have also been opened under the supervision of a lady doctor, who helps to train local dais. Quinine is sold at half price or distributed free to poor villagers and a touring medical officer has also been appointed. The Satara Local Board has opened 50 Centres for rural medical relief, in charge of educated villagers with a supervising medical officer who is also responsible for epidemic duty and for medical inspection of school boys.

Responsibility for the efficiency of rural medical relief rests with Government through the agency of Local Bodies and the following review of the methods by which the problem can be attacked or which have been employed elsewhere, may be of interest:—

(1) *Existing system.*—In the Bombay Presidency, including Sind, a cadre of 18 Bombay Medical Service, Class II, and 249 Subordinate Medical Service Officers is maintained for the administration of 267 dispensaries excluding the 111 dispensaries, for which medical staff is recruited independently by the bodies concerned. The extent of the relief which they provide is detailed in the tables attached to this Report and though the total number of individuals treated amounts to 25,90,627, there still remain very large areas in which medical aid is not available. The Medical Officers employed are Government servants for whose services district boards pay a fixed contribution equal to about 66 per cent. of the cost and supervision is exercised by the Civil Surgeon of the district. Management of the institutions rests

with the local bodies, but the transfers, necessary with such a large cadre, are managed by the Surgeon-General, who consults local opinion whenever possible.

(2) *Village aid posts.*—Especially trained compounders, schoolmasters or educated villagers are given a limited supply of drugs and dressings with which they can administer simple treatment or first-aid. The method which is employed in several districts is cheap, but cannot be satisfactory, or a reasonable substitute for a qualified medical man.

(3) *Subsidies.*—In other Presidencies (e.g. Madras, and United Provinces), subsidies are given as a small allowance to private medical practitioners and a supply of drugs and dressings on condition that they settle in villages and give free treatment to the poor. The results have been very variable.

(4) *Travelling dispensaries.*—For the treatment of special diseases, e.g. leprosy, eye diseases, etc. excellent work has been done but in general the scheme is expensive, and not sound unless the area to be served is a limited one. The same objection applies to the employment of travelling doctors.

(5) *Private agencies.*—Magnificient work is being done by Mission hospitals in many parts of the Presidency which would have suffered badly but for the unstinted aid which has always been given. Valuable work is also being done by the Red Cross Society in several districts.

Whatever scheme is decided upon, the necessity of providing for skilled maternity aid, prevention of disease and medico-legal duties must always be remembered, and these duties can only be performed by properly qualified medical men, while a system employing unqualified or lay assistance can only be recommended as a temporary expedient. It is suggested that the problem is one rather of administration than of methods to be employed. In every district a number of small towns ought to be supporting something like a cottage hospital which, in addition to providing medical aid, would have an educative force on the local community, would raise the tone of the medical profession and act as a rallying point for its members. It ought also to produce a marked effect on maternal and infant mortality. It is quite outside the financial power and scope of any central authority either to initiate or to maintain entirely such institutions, but it is probable that financial help can be secured locally, if it is felt they are really parochial affairs, not supported entirely from taxation. The necessary impetus and initiation for any scheme of local medical relief should therefore come from the local bodies, and co-ordination by a district medical or health authority, such as suggested by the Reorganisation Committee of 1932, is the most practicable solution of this problem which has been suggested. Such an authority which is similar to the administrative organisation in England and other countries, would co-ordinate all the medical activities in each district and administer such Government grants as could be made available. Its members would be representatives of the local boards and municipalities, and expert advice could be given and supervision exercised by the Civil Surgeons. Some

such method of administration and decentralisation would appear to be the solution of this very difficult problem of rural medical aid rather than a concentration on the existing rigid system.

Anti-rabic treatment.

10. Centres for Anti-rabic treatment exist at the following Government Institutions :—

1. Haffkine Institute, Parel (Bombay).
2. Civil Hospital, Ahmedabad.
3. Do. Ahmednagar.
4. Do. Belgaum.
5. Do. Hyderabad (Sind).
6. Do. Jalgaon.
7. Do. Karachi.
8. Do. Karwar.
9. Do. Nasik.
10. Do. Poona.
11. Do. Ratnagiri.
12. Do. Sholapur.
13. Do. Surat.

With effect from 1st April 1933 the price charged for Anti-rabic vaccine supplied from the Haffkine Institute has been reduced from Rs. 10 to Rs. 5 per treatment. The reduced price is exclusive of packing and freight charges.

Non-Official Societies.

11. The non-official societies or associations concerning themselves with Infant Welfare, Baby Weeks, Leprosy, Blindness, Tuberculosis, Social Hygiene etc., and the Red Cross Society are doing good work in the Field of Medical relief.

Mental Hospitals.

12. An annual report of the Mental Hospitals in the Bombay Presidency is printed separately, but a graph (appended) has been prepared to show the increasing population of these institutions, compared with the available accommodation. Taking into consideration the averages of the past ten years, it appears that the Mental Hospital population is increasing at the rate of at least 60 per annum a not un-expected figure in view of the fact that the proportion of cures is always small in these diseases and that with improved knowledge and general administration more of such patients will inevitably be sent to Hospital. The latest figures available give 13·1 per cent. cured and 4 per cent. improved of the total population in Bombay Mental Hospitals. Schemes for improvements and for dealing effectively with the Naupada Mental Hospital have been postponed on account of financial stringency but the necessity for building a new Hospital for Mental patients must be faced in the near

future. It is unfortunately a fact that the majority of patients in Mental Hospitals are incurable and at present no useful purpose would be served by separate provision for Mental defectives. There is, however a definite need for a small Hospital preferably near Bombay to provide accommodation for patients suffering from minor mental ailments, which react to skilled treatment.

Haffkine Institute, Bombay.

13. The following notes from a review of the work at this Institute for 1934–35 are of interest :—

(*a*) *General.*—During the period under review this Institute has continued to function as a centre for preparation of preventive vaccines. Over eighteen lakhs doses of anti-plague, about 2 lakhs doses of cholera, thirty-four thousand doses of anti-meningococcal and twelve thousand doses of anti-typhoid vaccines were manufactured during the year.

Financially the year proved to be quite favourable, the sale of vaccines and other products bringing in a revenue of Rs. 3,47,924 against a total expenditure of Rs. 3,08,025.

(*b*) *Plague Research—*

(*i*) *Vaccine.*—Researches to elucidate the effect of storage on the efficiency of the vaccine, its production from a virulent and virulent cultures, the growth of plague cultures used for its manufacture at the room and incubator temperature, together with various other important aspects of the vaccine problem have been undertaken.

(*ii*) *Serum.*—Animal experiments, financed by the Indian Research Fund Association to the extent of Rs. 51,000 to improve the production of an anti-plague serum has been very encouraging.

(*iii*) *Destruction of rodents and fleas.*—A comparative study of the various preparations in the market (including Calcium Cyanide) has been investigated and a valuable technique for prophylaxis of the disease has been evolved.

(*iv*) An average of 2,000 to 3,000 rats are daily brought to the Institute by the Sanitary Department of the Municipality and Port Health Authorities and examined for signs of plague.

(*c*) *Anti-rabic Section.*—Besides the preparation of Plague, Cholera, Typhoid and Meningococcal vaccines, referred to above, the Institute prepares anti-rabic vaccine for the whole of the Presidency and neighbouring Indian States. The treatment of local cases is carried out at the Institute, the number of cases thus dealt with being 2,580 this year. Nearly six thousand treatments were sent to outstations.

(*d*) *Diagnostic Department.*—Nearly six thousand specimens sent by hospitals and dispensaries were examined during the year.

(*e*) *Snake Venom.*—Snake venom was collected during the year for despatch to the Central Research Institute, Kasauli, where the antivenine serum is manufactured, and to various scientific workers in Europe and America for experimental purposes.

(*f*) *Biochemical unit.*—This Unit has done valuable work for concentration of anti-plague serum, testing of proprietory Calcium Cyanide preparations, manufacture of anticyanide treatments and routine diagnosis of metabolic diseases like diabetes, etc.

Port Health Administration.

14. The following are some of the important measures initiated and the improvements effected in the Port Health Administration in this Presidency during the triennium under report.

Administration.

(1) The Indian Pilgrim Ships Rules have been revised embodying numerous alterations in keeping with modern requirements.

(2) Revision of the Port Quarantine Rules for Indian Ports along improved lines was initiated and is under the consideration of the Government of India.

(3) The formation of Port Sanitary Authorities has been taken in hand by the Government of India and is under their consideration.

(4) Revaccination Rules have been initiated whereby the vaccinal state of both the crews and passengers ex-India has been vastly improved resulting in the transmission of far less subsequent infection to ships with less inconvenience thereto on arrival in overseas ports.

(5) The Introduction of International wireless messages from ships arriving in ports has accelerated the grant of pratique thereto and the disposal of sick therefrom.

Passengers and crews.

(1) Pilgrims for the Haj must now be protected against Cholera and Small-pox and improved facilities both for waiting accommodation and direct embarkation after medical inspection have been provided.

(2) The introduction of Medical Inspection Cards for local passengers has greatly accelerated inspections and constitutes a check upon missing passengers.

Ships.

Inspection of provisions, with the ready co-operation of the Municipal Health Authorities and the Chemical Analyser to Government, has resulted in great improvement in the quality of Ghee and other provisions supplied to crews and shipping companies.

The Chemical Analyser to Government.

15. A separate report of the working of this Department is published. In the following table are shown the analyses under all heads during the past five years :—

Class.	1930.	1931.	1932.	1933.	1934.
Medico-legal examination ..	4,198	4,183	4,376	5,615	5,164
Potable Water ..	38	38	39	..	..
Government Stores ..	405	177	421	284	284
Excise	4,557	4,033	3,570	2,738	2,926
Miscellaneous	580	386	331	441	361
Total ..	9,778	8,817	8,737	9,078	8,735

Statement A.

16. The total number of institutions open at the beginning of the triennium was 675. During the triennium 12 new dispensaries were opened and 3 were closed. Consequent on the transfer of control of Aden, the Indian States etc., to the Government of India, the statistics of the Hospitals and Dispensaries in Aden and in the Indian States etc., which numbered 151 are not included in this report. The number of institutions actually at work on 31st December 1934 was 533.

Statement B.

17. The following table shows the number of patients treated during the last 3 years and also the average number for this and the last triennium :—

—	1932.	1933.	1934.	Average for the triennium 1929-31.	Average for the triennium 1932-34.
The number of in-patients treated during ..	104,534	112,720	115,775	110,095	111,010
The number of out-patients treated during ..	3,630,440	3,097,598	2,982,840	3,802,983	*3,236,959
Total number of patients treated during ..	3,734,974	3,210,318	3,098,615	3,913,078	*3,347,969
Number of women patients treated both in general and female hospitals and Dispensaries	820,149	741,114	717,406	863,547	*759,556

**Note.*—There is a marked decrease of 14·4 per cent. in the attendance of patients at the hospitals and dispensaries during this triennium over the former. There are two causes for this, (1) During this triennium Aden was transferred to the Government of India and hence the statistics of patients from the Medical Institutions in Aden are not included in the report since 1932, and (2) levy of one anna fee has mainly reduced the number of out-door patients. The levy of two annas fees for in-door patients has however not affected the in-door attendance.

The following table shows the average number of daily attendance of in-door and out-door patients, cures and mortality during this and the last triennium.

		Triennium 1929–1931.	Triennium 1932–1934.
Mean daily average attendance of patients.	In-door ..	4,994	4,798·9
	Out-door ..	36,451·3	30,241·2
Average number of in-patients cured		66,814	65,978
Average mortality		7,396	7,481
Ratio of death per cent. to the total treated as in-patients		6·7	6·7

The number of beds available was 7,210 in 1934 against 7,280 in 1931.

STATEMENT C.

Statement

18. The following table shows the principal diseases among the Municipal fund and Private-Aided Institutions during

Name of Disease.		1932		1933	
		Cases.	Deaths.	Cases.	Deaths.
Cholera	In-door ..	19	7	97	35
	Out-door..	433	..	1,281	..

223,252	..	239,127	....	296,310	....

Detailed comment on these figures is not necessary, and reference is only made to three items, Leprosy, Tuberculosis and Labour cases, in order to emphasize their importance in any Bombay Health Report.

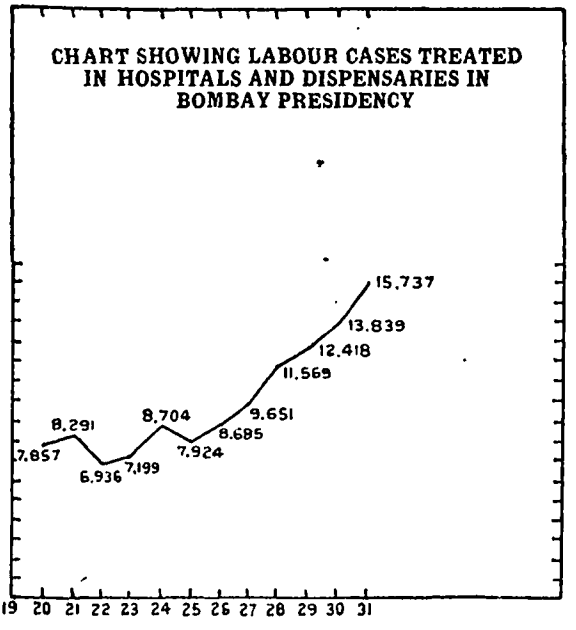
(1) *Leprosy.*—It is very difficult to say definitely whether this disease is increasing to any serious extent but, due to the confidence established by improved methods, undoubtedly more lepers are seeking treatment, while our knowledge of the disease itself has advanced considerably during the past few years. In dealing with Leprosy we have to consider (I) the advanced case, sometimes "burnt out" and non-infectious but maimed and disfigured, unable to earn a living and forming a large percentage of the beggar population and (II) the early case, whose disease can be cured, or at the most arrested and rendered non-infectious, and who is anxious to avoid being classed as a leper.

For the former institutional care and treatment in leper hospitals is necessary and grants are made by Government either on capitation basis at the rate of Rs. 10 and Rs. 5 per mensem for each statutory adult and child leper and Rs. 5 and Rs. 2-8-0 for each non-statutory adult and child leper respectively or by fixed grants in some cases for their maintenance. Under the Municipal Acts, the Municipalities also pay for lepers from their area at the rates prescribed for each leper hospital. 14 special hospitals with accommodation for about 1,500 lepers exist in the Presidency (including 1 in Karachi, Sind) and of these 1, the Kagrapeth Leper Hospital at Ahmedabad, is maintained entirely by Government.

The second type or less advanced case is best dealt with in a special clinic, either at or near a hospital, such as the 36 clinics maintained by the Bombay Branch of the British Empire Leprosy Relief Association. The results attained both by treatment and propaganda are most encouraging and no better method of dealing with the leper problem can be suggested than by active and financial support to these clinics.

Tuberculosis.—The figures in Statement C are no indication of the real extent of the disease or of its grave menace to public health. Little has been done in Bombay to combat Tuberculosis except propaganda, which, without treatment, is not very successful. A few hospitals have special accommodation for tuberculosis patients and there are only 7 Sanatoria in the whole Presidency, none for poor people. It should be remembered, however, that the decline of Tuberculosis in Europe is not mainly due to the provision of costly Sanatorium treatment but to improved methods of Hygiene and Public Health and to the advice and education obtained at special Tuberculosis Clinics or Dispensaries. Only four such clinics exist:—Bombay, Ahmedabad, Hyderabad (Sind) and Karachi and the extension of such a method for dealing with the disease by specially trained officers and nurses is one which merits serious consideration.

Labour cases.—Women are seeking hospital care during labour in increasing numbers and it is difficult for Government hospitals to keep pace with the requirements in this respect (see graph). Private Maternity Homes are popular and are opening in large numbers. Many are excellent and it will be necessary to watch this development and to ensure that a high standard both of accommodation and Hygiene is maintained.



Statement E.

19. The following statement shows the number of patients treated according to their classes:—

Class.	1934.	Average for 1929–31.	Average for 1932–34.
Hindus	19,23,679	21,46,949	21,13,170
Mussalmans	10,02,219	12,52,596	10,60,916
Europeans and Anglo-Indians	30,105	26,596	27,370
Other classes	1,42,552	1,86,937	1,46,512

Statement F.

20. During the year 1934, 1,54,018 Surgical operations were performed on 1,51,417 persons with a mortality of 0·6 per cent. The mean number of Surgical operations performed during the triennium was 1,45,587 against 1,39,519 in the preceding triennium. The average number of persons operated on during the period under report was 1,43,489 with a mortality of 0·5 per cent. as compared with 1,38,439 with the same percentage of mortality in 1929–1931.

Statement G.

21. The total gross receipt from all the hospitals and dispensaries amounted to Rs. 18,54,584, out of which hospitals fees collected were Rs. 3,60,155.

The total expenditure for maintaining these hospitals excluding charges on the investments and construction of buildings amounted to Rs. 49,22,683 during 1934. The average gross cost per in-patient per annum (inclusive of expenditure on out-patients) was Rs. 993 for the year 1934.

During the year 1934 the working of the hospitals and dispensaries resulted in an excess of expenditure over receipts amounting to Rs. 30,68,099. This excess was, however, met from General Revenues and from those of the Local Bodies concerned.

In the case of Government hospitals and dispensaries where the daily average of in-door patients was 2,694·8, the gross expenditure involved during 1934 was Rs. 24,23,192 resulting in an average gross expenditure of Rs. 899 per in-door patient (inclusive of expenditure on out-patients) per annum. The total receipts realised by Government against this expenditure amounted to Rs. 6,67,342 of which the hospital fees were Rs. 2,34,911. The net cost to Government was therefore Rs. 17,55,850, i.e., Rs. 652 per in-patient (inclusive of expenditure on out-patients) per annum.

The daily average number of in-patients treated at the non-Government Institutions reviewed in the Report was 2261·4 and against the total expenditure of Rs. 25,12,709 on these patients, Government contributed to the extent of Rs. 5,23,646 in the shape of the expenditure on account of pay and allowances of Medical Officers lent and annual contributions to some of the institutions. The amount of contributions received by Government from these institutions during the year against this expenditure has been taken at Rs. 3,07,800, the net cost to Government being Rs. 2,15,846 or 8·6 per cent. of the total expenditure incurred on these non-Government institutions. The gross and the net average expenditure per patient per annum (including charges on out-patients) amounted to Rs. 1.111 and Rs. 585 respectively.

It may not be out of place to recapitulate here the financial account of the Medical Department for the financial year 1934–35. The total expenditure incurred during the year amounted to Rs. 47,50,824 as detailed below. The receipts against this expenditure were Rs. 14,82,878 as shown below. The net cost to Government or the general tax-payer on the administration of the Medical Department was, therefore, Rs. 32,67,946 only :—

Expenditure.	Rs.	Receipts.	Rs.
Medical Establishment ..	5,18,292	Medical Schools and Colleges.	2,32,442
Hospitals and Dispensaries	27,38,142	Hospitals fees ..	2,43,525
Grants for Medical purposes	3,08,918	Mental Hospital receipts ..	1,79,728
Medical Colleges and Schools	4,60,827	Sale of Medicines ..	1,103
Mental Hospitals ..	4,95,622	Contributions ..	7,61 690
Chemical Analyser ..	60,673	Income from Endowments..	22,578
Gain on English Stores ..	—423	Miscellaneous ..	47,079
Expenditure in England ..	1,68,773	Deduct refund ..	—5,293
		Receipts in England ..	26
Total ..	47,50,824	Total ..	14,82,878

Statement H.

22. On the 1st January 1934, the invested capital stood at Rs. 20,33,474. During the year Rs. 55,319 were invested and securities worth Rs. 10,360 were sold or withdrawn, leaving the total invested capital at the end of the year at Rs. 20,78,433.

Distribution of Medical personnel.

23. The following table shows the number of Medical Officers including (Honorary Medical Officers), Nurses, Midwives, Dais and Compounders employed during the year 1934 in the several institutions :—

Class of Hospitals and Dispensaries.	Medical Officers.	Nurses.	Midwives.	Dais.	Compounders.
State-Public ..	294	331	21	3	84
State-Special ..	11	11	..	..	8
Local and Municipal Fund ..	449	205	93	45	411
Private-Aided ..	32	41	15	14	17
Total ..	786	588	129	62	520

24. Graphs giving the following information are appended to this Report :—

EXPLANATORY NOTES.

Hospitals and Dispensaries.

EXPENDITURE.

1908–1909.—Due to increased grant-in-aid for Nursing, revisions for establishment, to increased grants for contingent expenses and charges for equipment of Hospitals in the Presidency.

1909–1910.—The increase is due to charges on the equipment of Hospitals in the Presidency.

1910–1911.—The slight increase as compared with 1908–1909 is due to revision of contract grants.

1911–1912.—Due to provision of X-Ray and other equipment to Hospitals, to opening of new dispensaries and revision of pay and allowances of the Physician, St. George's Hospital.

1912–1913.—Due to creation of Civil Surgeoncy at Jalgaon, increased expenditure on Nursing establishment and additional equipment supplied to hospitals.

1914–1915.—Increase due to increase in the grants to new dispensaries, and the Nursing Associations.

1916–1917.—Due to increased provision for supplies and services and Hospital equipment and to grants to new dispensaries.

1918–1919.—Due to grants to Nursing Associations and to new Hospitals and Dispensaries.

1919–1920.—Due to revision of pay of the I.M.S. Officers and S.M.S. Officers, to the Nursing Establishment at the Sasson Hospital and to the increase in the diet grants of hospitals and capitation grants for non-resident lepers.

1920–1921.—Due to large expenditure on supplies and services and contingencies of Government Hospitals owing to high prices and increased number of patients and enhanced salaries of I.M.S. Officers.

1921–1922.—Due to increased grants for opening of new dispensaries, revision of quinquenial grants to Dispensaries, revision of pay of establishment, and special building grants.

1922–1923.—The increase as compared with the expenditure during 1920–1921 is due to revision of the pay of I.M.S. Officers and S.M.S. Officers.

1924–1925.– The increase is due to payment of arrears of increment to certain S.M.S. Officers, increased grants-in-aids for Nursing at certain Hospitals, and increase of accommodation at one Hospital.

1925–1926.—Due to increased grants to Nursing Associations and to non-Government Hospitals and Dispensaries.

1926–1927.—Increase is due to the special non-recurring grant to the N. M. Wadia Maternity Hospital at Bombay.

1927–1928.—The decrease is due to the reduction in the provision of contingencies and in the grant under Lepers Act and due to shortage of I.M.S. Officers.

1928–1929.—The increase is mainly due to the contributions from Local Boards, Municipalities etc., which were shown hitherto as deduct entries from the expenditure being omitted and shown on receipt side under 22-Medical.

1930–1931.—The decrease is mainly due to compulsory reduction in diet grants.

1932–1933.—Due to general retrenchment and economy in expenditure, to 10 per cent. cut in pay, to the reduction of some I.M.D. posts and to the revision of rules in travelling allowance and other allowances.

RECEIPTS.

1916–1917.—Due to increase in the sale proceeds of quinine treatment and to the increased grant by the Bombay Port Trust.

1920–1921.– Due to increase in the contribution of the Bombay Port Trust and due to larger Hospital fees.

1921–1922.– Due to larger Hospital receipts and to the change in classification by which interest on Government securities being credited to this head.

1923–1924.—Due to increased Hospital fees.

1925–1926.—Due to increase in the number of beds and consequently in the number of patients.

1926–1927.—The decrease is due to the restrictions imposed in the revised Hospital fee rules, to the reduction of Hospital beds in some Hospitals and to 2 states having opened anti-rabic centres in their jurisdiction, thus reducing the patients in the British territory.

APPENDIX I.

Civil Hospital and Dispensary Statistics.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1934.

(Total population of the Province—3,03,22,512.)

Class of Civil Hospitals and Dispensaries.	Number open on 31st December 1933.		Number opened during the year 1934.		Number closed during the year 1934.		Number transferred to other department or class.		Number open on the last day of the year 1934.		Remarks.
	Rural.	Urban.	Rural.	Urban.	Rural.	Urban.	Rural.	Urban.	Rural.	Urban.	
1	2	3	4	5	6	7	8	9	10	11	12
I. State—Public ..	4	46	..	..	..	..	..	..	4	46	
II. State—Special—											
(i) Police ..	1	3	..	..	..	1(*a*)	..	..	1	2	1(*a*) Jalgaon Police Hospital, *vide* G.R., H.D., No. 3278/3, dated 2nd November 1933.
(ii) Canals ..	1	..	..	..	..	..	..	..	1	..	
(*iii*) Others ..	4	6	..	..	..	..	..	..	4	6	
III. Local and Municipal Funds.	147	199	1(*b*)	..	1(*c*)	..	..	..	147	199	1(*b*) in Belgaum District. 1(*c*) L.T. Hospital Tatta, District Karachi. Male and female sections are combined.
IV. Private—Aided ..	6	12	..	..	..	..	..	..	6	12	
V. Private—Non-aided ..	17	23	..	..	..	..	..	..	17	23	
VI. Railways ..	21	44	..	..	..	..	..	..	21	44	
Total for the Province ..	201	333	1	..	1	1	..	..	201	332	

Classes I and II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as "State" when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—"Public" are State Dispensaries which are open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

Class III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

Class IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

Class V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

Class VI.—Comprises all railway dispensaries whether maintained by State railways or others.

Provincial Total, Class A.—General Hospitals and Dispensaries	14,04,853	53,554	14,58,407	1,600	4,060	14,52,747
Provincial Total, Class B.—Female Hospitals and Dispensaries	6,28,621	1,765	6,30,386	4,700	..	6,25,686
Combined Provincial, Total.	20,33,474	55,319	20,88,793	6,300	4,060	20,78,433

The difference of Rs. 6,288 between the closing balance for the year 1933 and the opening balance for 1934 is due to the fact that Rs. 3,900 and Rs. 2,388 were shown as closing balance for 1933 against Civil Hospitals, Hyderabad and Mirpurkhas respectively. But in the former case it was a balance of the Nursing Association and in the latter case the amount was not invested but was actually paid into Government Treasury in 1933 and hence these balances have been omitted.
